# ICT ENABLED TEACHING METHODOLOGIES

Column chromatography is a technique which is used to separate a single chemical compound from a mixture dissolved in a fluid. It separates substances based on differential adsorption of compounds to the adsorbent as the compounds move through the column at different rates which allow them to get separated in fractions. This technique can be used on a small scale as well as large scale to purify materials that can be used in future experiments. This method is a type of adsorption chromatography technique.

## E CLASS

## Use of LMS in Teaching – Learning

The screenshot displays a Google Classroom interface for a course titled "B.Sc Sem III 2020-21 Paper- II". The course is managed by Dr. Rashmi Jachak. The interface shows a list of posts and comments:

- Post 1:** A post by Dr. Rashmi Jachak dated 5 Feb 2021, containing a Google Meet link: [meet.google.com/cec-ifwf-kje](https://meet.google.com/cec-ifwf-kje) and the text "join the meeting at 10:45 a.m".
- Post 2:** A post by Dr. Rashmi Jachak dated 4 Feb 2021, containing the same Google Meet link and text.
- Post 3:** A post by Dr. Rashmi Jachak dated 3 Feb 2021, containing the same Google Meet link and text.
- Comment 1:** A comment by Prachi Mankar dated 11 Oct 2020, stating "Class :Bsc cbz ,3 sem Sub:botony" and "1 attachment".
- Comment 2:** A comment by Dr. Rashmi Jachak dated 10 Oct 2020, stating "Good morning students. I just posted a notes on some topics of unit II. Your unit I test will be on wednesday 14 October 2020 at 11:30 am. Google link will be provide only in google classroom only."
- Post 4:** A post titled "New material: Vacuoles, Ribosome, glyoxysomes and..." dated 10 Oct 2020.

### Outside function as inline

We can define a member function outside the class definition and still make it inline by just using the qualifier inline in the header line of the function definition.

**Example:**

```
#include<iostream.h>
#include<conio.h>
class InlineDemo
{
    int a;
    public:
    void getdata(int n);
    void show();
};
inline void InlineDemo::getdata(int n)
{
    a=n;
}
inline void InlineDemo::show()
{
    cout<<"Value of a="<<a;
}
```

```
void main()
{
    InlineDemo obj;
    obj.getdata(10);
    obj.show();
    getch();
}
```

**Output:**  
Value of a= 10
